ABOUT ME

Languages | Java, Python, C, C++, JS, TS, Scheme, Bash, CSS, HTML, SQL
Technologies | EC2, Flask, Express, MongoDB, Node, React, Angular, Tailwind
Development | Git, Linux, Make, Valgrind, Address Sanitizer, GDB, GCC

PROJECTS AND OTHER EXPERIENCES

UW Assignment Planner — MongoDB, Express, Angular, NodeJS

- Created an assignment planner for UWaterloo students using the **MEAN** stack
- Built **RESTful APIs** with **Express.js** for storing and updating tasks
- **Integrated third-party APIs** (e.g. Google calendar and notification) to enhance functionality

Portfolio Website — React

- Developed a modern and responsive portfolio website using React, showcasing past experiences.
- Utilized React Router for seamless navigation between different sections of the website

SLMod — Java, Flask, MongoDB, HTML

- Produced a portable Java QOL game modification used by over **40** users daily
- **Led a team of three developers** to develop a backend **Flask** user-tracking system
- Created an online dashboard with **HTML, CSS** to visualize **over 6800** logged user log-on

Boulder Solver — Java

- Developed a solver that solves complex boulder puzzles in the requirements of a client
- Engineered a backtracking algorithm that solves any 7x7 boulder puzzle in under **100ms**
- Constructed an interactive **Java** Swing UI to display the most optimized path and provide hints

Chess Engine — C++

- Developed a Chess engine in C++ strictly adhering to **OOP** principles, ensuring modularity and reusability.
- Adeptly implemented advanced design patterns such as **MVC architecture**, **Observer**, and Iterator Patterns

WORK EXPERIENCE

Bonumcare — CSS, HTML, and JavaScript

Software Developer, Remote

Seattle, WA (Summer 2023)

- Developed a **GPT-3.5** based "Conversation Buddy" to chat with lonely elderly individuals
- Implemented a APIs on an **Express** server to send and receive over 300 messages daily
- Maintained and updated the chatbot's knowledge base, ensuring the accuracy and relevance of information in its output

Content Creation — YouTube

(March 2022 - May 2023)

- Produced video content for a broad audience of an average of **60,000** viewers on YouTube
- Negotiated and finalized strategic partnerships with multiple sponsors (e.g. **Plarium, Akrew**)
- Conducted A/B Testing on thumbnails to increase audience click-through rate

EDUCATION

University of Waterloo

Waterloo, ON

Honours Bachelor of Computer Science

- GPA: 3.95 (CAV: 92.1%)
- Relevant Coursework: Data Structures, Object Oriented Programming, Algorithm and Data Abstraction, Compilers, Tools and Techniques for Software Development
- Honours: CS Intl. Student Upper-Year Scholarship, Presidential Scholarship of Distinction, Term Distinction (Totalled over CAD\$ 8,000)
