EDUCATION

Honours Bachelor of Computer Science, Artificial Intelligence Specialization

Sept 2023 - Dec 2027

University of Waterloo

Waterloo, ON

- **GPA: 3.96 / 4.0 (CAV: 92.44%, Candidate for Deans Honours)**
- Relevant Coursework: Data Structures, Object Oriented Programming, Compilers, Elementary Algorithms
- Honours: CS Intl. Upper Year Scholarship, Presidential Scholarship of Distinction (Totalled CAD\$ 8,000)

SKILLS

Languages C++ | Java | C | Python | JavaScript | TypeScript | Scheme | HTML | CSS | Bash | SQL

Technologies AWS EC2 | Express | Flask | MongoDB | Node | Nginx | Docker | React.js | Angular.js | Git | Unix | Valgrind

EXPERIENCE

Huawei Canada

Jan 2025 - Apr 2025

Incoming Software Engineering Intern - Compiler

Markham, ON

University of Waterloo

Sept 2024 - Present

Statistics Undergraduate Teaching Assistant

Waterloo, ON

- Coordinated with Professor Faisal Al-Faisal to evaluate assignments and exams for a probability course with **150 students**, ensuring accurate and timely feedback

Bonumcare

June 2023 - Aug 2023

Freelance Software Developer

Remote

- Engineered a "Conversation Buddy" for the elderly using an **Express.js** server on **AWS EC2**, deployed with **Nginx**, facilitating **over 300** message transactions daily through robust RESTful APIs.
- Redesigned the interactive chatbot user interface using **React, HTML, and CSS**, receiving positive feedback from 90% of elderly users.

NOTABLE PROJECTS

UW Computer Science Club - CodeyBot

Sept 2024 - Present

Developer

Waterloo, ON

- Developed and maintained CodeyBot, a multi-functional Discord bot, utilizing **TypeScript, Docker, SQLite, Discord.js**, and **Sapphire**, to deliver features such as coffee chat matching, and mock interview scheduling
- Collaborated with a **team of 11** to review code and brainstorm innovative features, successfully deploying Codey-Bot to a server with **over 4,500 members**, enhancing community engagement and functionality.

UWCompass

Aug 2024 - Present

- Led the development of UWCompass, an interactive application built with **React** designed to streamline degree requirement tracking and course planning for Waterloo students.
- Leveraged **BeautifulSoup** to scrape and store **over 5000** courses, using **dynamic JSON handling** to efficiently manage and enhance the scalability of academic program databases.

UWScheduler

Dec 2023 - Present

- Built a robust assignment planner and scheduling app for students using the **MEAN** stack, designing a modern frontend with **Angular** and building **RESTful APIs** with an **Express.js** server for CRUD operations
- Engineered a secure user authentication system using **Express.js, MongoDB Atlas**, and **jsonwebtokens**, integrating **bcrypt** for password hashing, enhancing overall application security and user data protection.

Chess Engine

Jun 2024 - Aug 2024

Project Lead

- Developed a Chess engine in **C++** featuring various levels of **AI opponents**, using advanced decision-making algorithms to incorporate piece values and to calculate complex evaluations
- Strictly adhered to **OOP** principles and advanced design patterns (MVC, Observer, Factory) to create a structured and maintainable codebase, ensuring high cohesion and low coupling, receiving a final project grade of **98%**.

SLMod

May 2021 - Dec 2023

Project Lead

- Maintained and developed a portable **Java** game modification used by **over 40** daily users at peak, implementing changes accordingly based on user feedback.
- Led a team of 5 to develop a user-tracking system on a **Flask** server on **AWS EC2** with data stored in **MongoDB**, deployed using **Docker**; visualized **over 6,800** user log-ins on an online dashboard, implementing **OAuth2** via Discord API for secure access.

VOLUNTEERING AND LEADERSHIP

UW Chinese Student Association, Marketing Executive

May 2024 - Present

Sunshine Action Club, Volunteer and Human Resource Manager

Sept 2022 - May 2023

Content Creator, YouTube (20,000+ subscribers, 3,000,000+ Views)

Sept 2021 - May 2023
