EDUCATION

Honours Bachelor of Computer Science, Artificial Intelligence Specialization

Sept 2023 - Dec 2027

University of Waterloo

Waterloo, ON

- GPA: 3.95 / 4.0 (CAV: 92.1%, Deans Honours)
- Relevant Coursework: Data Structures, Object Oriented Programming, Compilers, Elementary Algorithms
- Honours: CS Intl. Upper Year Scholarship, Presidential Scholarship of Distinction (Totalled CAD\$ 8,000)

SKILLS

Languages C++ | Java | C | Python | JavaScript | TypeScript | Scheme | HTML | CSS | Bash | SQL

Technologies AWS EC2 | Express | Flask | MongoDB | Node | Nginx | React.js | Angular.js | Git | Unix | Valgrind

EXPERIENCE

Bonumcare

Summer 2023

Software Developer

Seattle, WA

- Engineered a "Conversation Buddy" for the elderly using an **Express** server on **AWS EC2**, deployed with **Nginx**, facilitating **over 300** message transactions daily through robust APIs.
- Redesigned the interactive chatbot user interface using **React, HTML, and CSS**, receiving positive feedback from 90% of elderly users.
- Authored comprehensive documentation for the chatbot to facilitate future maintenance and code reuse

Content Creator

May 2021 - May 2023

YouTube

- Produced video content for a broad audience of an average of **60,000** viewers and **20,000+** subscribers on YouTube
- Negotiated and finalized strategic partnerships with multiple sponsors (e.g. **Plarium, Akrew**)

NOTABLE PROJECTS

SLMod

May 2021 - Dec 2023

Lead Developer

- Maintained and developed a portable **Java** game modification used by **over 40** daily users at peak, implementing changes accordingly based on user feedback.
- Led a team of 5 to develop a user-tracking system on a **Flask** server with data stored in **MongoDB**; visualized **over 6,800** user log-ins on an online dashboard, implementing **OAuth2** via Discord API for secure access.

Chess Engine

Jun 2024 - Aug 2024

Project Lead

Waterloo, ON

- Developed a Chess engine in **C++** featuring various levels of **AI opponents**, using advanced decision-making algorithms to incorporate piece values and to calculate complex evaluations
- Strictly adhered to **OOP** principles and advanced design patterns (MVC, Observer, Factory) to create a structured and maintainable codebase, ensuring high cohesion and low coupling
- Led a team of 3 to maintain comprehensive documentation and UML diagrams to streamline initial planning and development, receiving a final project grade of **98%**.

UWaterloo Assignment Planner

Dec 2023 - Present

Developer

Waterloo, ON

- Designed a robust assignment planner for UWaterloo students using the **MEAN** stack, building **RESTful APIs** with an **Express** server for efficient task management.
- Integrated third-party APIs, such as Google Calendar, to enhance functionality with notifications.

Boulder Solver

Dec 2022 - May 2023

Developer

- Engineered a backtracking algorithm in **Java** that optimizes path generation for any map in **under 100ms**, reducing computation time by **50%**.
- Designed a user-friendly GUI with **Java Swing**, and strictly following **OOP** principles for maintainability and scalability.

VOLUNTEERING AND LEADERSHIP

UW Chinese Student Association, Marketing Executive

May 2024 - Present

Sunshine Action Club, Volunteer and Human Resource Manager

Sept 2022 - May 2023
